

# Umbilicals

www.GEOCABLES.COM/MARINE

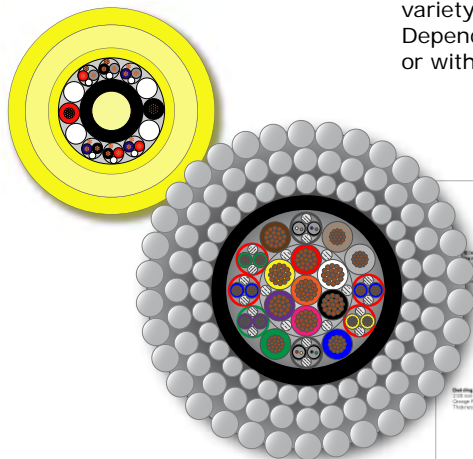

Cables, umbilicals and assemblies for use in a multitude of marine geophysical applications from conventional towed streamers to OBC and permanent reservoir monitoring.

## Tail Buoy Cables

Our brand new manufacturing facility is capable of producing an almost unlimited variety of custom-built cables, incorporating power, signal and optical elements. Depending on design, continuous lengths of 10,000 ft and longer can be built with or without strength members including steel wire armoring.
